

UNIVERSAL HOBBY ADHESIVE

CRYSTAL-CLEAR HOUSEHOLD GLUE IN A HANDY BOTTLE.

Stains/residue: The glue dissolves in alkaline detergents (e.g. heavy duty detergent). Stains in clothing can be removed by treating them generously with heavy duty detergent first and then washing the clothing at 90°C or 60°C (prewash program). Small stains can be removed with acetone.

TECHNICAL PROPERTIES

Water resistance: Very good

Temperature resistance: long-term up to max. +70°C, briefly up to 120°C.

Chemicals resistance: Resistant to water, diluted acids, alkalines, petrol and oil.

TECHNICAL SPECIFICATIONS

Chemical base: Polyvinyl ester copolymer

Colour: Crystal clear

Viscosity: approx. Liquid

Solid matter: approx. 34 %

Density: approx. 0.95 g/cm³

STORAGE CONDITIONS

At least 24 months after date of manufacture. Limited shelf life after opening. Store in a dry, cool and frost free place.

PRODUCT DESCRIPTION

Crystal-clear household glue in a soft and handy plastic bottle with a unique 3-position twist-applicator for glueing dots, lines and surfaces. Excellent for 1001 household and hobby glue jobs. Dries fast and washes out at 60°C.

FIELD OF APPLICATION

Universal - glues cardboard, paper, felt, leather, cork, fabrics, wood, among themselves and to metal, porcelain, glass, Styrofoam® and many plastic materials. Not suitable for photos, Polyethylene (PE) and Polypropylene (PP).

PROPERTIES

In handy Twist & Glue bottle: for glueing dots, lines and surfaces

- Crystal-clear
- Does not wrinkle paper
- Permanently flexible
- Washable at 60°C

PREPARATION

Working conditions: Do not use at temperatures below +5°C.

Surface requirements: Materials to be glued must be clean, dry and free of dust and grease.

Preliminary surface treatment: By slightly roughing plastic and metal surfaces, a stronger bond is obtained.

APPLICATION

Directions for use:

Depending on the nature of the materials, apply glue thinly to one or both sides to be glued. Join parts immediately and press firmly.
