

AIR MAX® MOISTURE ABSORBER

DEVICE THAT FIGHTS CONDENSATION, MOISTURE AND STALE SMELLS IN SPACES WITH LITTLE OR NO VENTILATION.

PRODUCT DESCRIPTION

Device that fights condensation, moisture and stale smells in spaces with little or no ventilation.

FIELD OF APPLICATION

Lowers high levels of relative humidity in closed spaces with little or no ventilation. Suitable for caravan, boat, barn, meter cupboard, attic, pantry, basement, crawl space, guest room, wardrobe, gazebo, kitchen, safe and laundry room.

PROPERTIES

- Suitable for all Air Max® refills: Air Max® Refill and Air Max® Turbo Tab
- Protects your valuables against moisture
- Uses no energy
- Refreshes the air
- Works clean
- Works silently

APPLICATION

Coverage: 450 g works for approximately 3 months in a room up to approximately 45 m³ and absorbs with a filling of 450 g approximately 0.5 litres of water, depending on the temperature, humidity and size of the room.

Directions for use:

User instructions for refilling with Air Max® Refill.

Remove the white cap from the Air Max device and place the refill bag in the container. Place the white cap back and Air Max® Ultra is ready for use. When the refill has dissolved completely, the Air Max® device can easily be emptied in the toilet or sink. The empty refill bag can be thrown into the waste container.

Always place the Air Max® device on a flat stable surface, preferably in a washtub.

Stains/residue: Spilt fluid can cause surface marks. These spots continue to attract moisture. Remove stains with an abundance of water. Remove stains in textiles (floor coverings, lining) with sodium sulphate. Make a 5% solution with water (50 g/l) and spread it over the stain. Approx. for approx. 30 minutes. Then dry it off using a hairdryer or electric heater. Remove the remaining powder with a vacuum cleaner. Repeat the process if necessary. Rinse wash basin or sink well with water. Avoid contact with leather and metal. These materials may be adversely affected.

Advice: Always place the Air Max® Moisture Absorber Original on a flat and stable surface.

Points of attention: At lower temperatures the Moisture Absorber works more slowly and clumping can occur. Increasing the temperature will speed up the working again. Avoid contact with leather, wood, stone and metal, as these materials can be affected negatively.

TECHNICAL SPECIFICATIONS

Chemical base: Calcium chloride

Colour: White

Specifications: Water absorption: about 1 gram of water per gram of salt.

STORAGE CONDITIONS

At least 24 months after date of manufacture. Store in well-sealed packaging in a cool, dry and frost free place.
