

# SUPER GLUE MINIS

## HIGH-QUALITY UNIVERSAL INSTANT GLUE.

**Preliminary surface treatment:** Any dust, oil, grease, wax or separating agent should therefore be thoroughly removed from the surfaces to be stuck together. The best way to achieve this is to rub the parts a number of times with appropriate solvents, such as acetone (if this is suitable for the material – check first!).

For metals and metal alloys it is usually sufficient to roughen the surface using emery paper or by grinding or brushing.

### STORAGE CONDITIONS

Store in a dry, cool, frost-free place. Storage below +5°C (in refrigerator) ensures maximum shelf life.

### PRODUCT DESCRIPTION

Extra fast and strong super glue - portioned in 1g tubes. Ideal quality for each application - 3x originally sealed tubes. Due to its liquid consistency the super glue reaches smallest corners and joints.

### FIELD OF APPLICATION

Bonds various materials, such as many synthetics, metal, rubber, porcelain, wood and cork. Not suitable for pottery, some synthetics (PE, PP, PTFE and silicone rubber) and car windows.

### PROPERTIES

- Extra fast and strong
- 3 x originally sealed tubes
- Ideal quality for each application
- Reaches the smallest corners and joints

### PREPARATION

**Working conditions:** Not to be applied at temperatures below +10°C.

**Personal safety:** Cyanoacrylate adhesives harden extremely quickly in the presence of moisture (such as air humidity, moisture in the skin, perspiration, skin sebum, tears). Care must therefore be taken during use, particularly as regards children and contact with the skin and eyes. But even without treatment, cyanoacrylate adhesives dissolve naturally with time.

**Surface requirements:** The materials to be bonded must be clean, dry, free of dust and grease, and well-fitting.
