SILICONE REMOVER
TO SAFELY AND THOROUGHLY REMOVE CURED SILICONE SEALANT RESIDUES

TECHNICAL SPECIFICATIONS
Chemical base: Organic solvent thickened to a paste.
Colour: Brown
Viscosity: approx. 0 mPa.s., Thixotropic
Density: approx. 0.8 g/cm³

STORAGE CONDITIONS
At least 24 months after date of manufacture. Store in properly sealed packaging in a dry place at between +5°C and +25°C.

PRODUCT DESCRIPTION
For thoroughly removing cured silicone sealant residues Simple and safe to use without damage.

FIELD OF APPLICATION
Suitable for thoroughly removing cured silicone sealant residues in joints and on substrates. Can be used on ceramic tiles, glass, metal, synthetics, laminates, aluminium and enamels. Not suitable for to be used on nylon. May cause staining on porous materials and painted surfaces.

PROPERTIES
· Safe to use without damage
· Easy to apply
· Thorough effect

PREPARATION
Working conditions: Do not use in temperatures ≤ +5°C.
Surface requirements: The substrate must be properly dry, clean and free of dust and grease. Remove as much of the existing silicon sealant as possible.
Tools: Use a sharp knife/putty knife to cut away the silicone sealant as much as possible and a dry cloth for the last remaining bits.

APPLICATION
Directions for use:
Apply the paste generously on the silicone residue, after stirring thoroughly. Allow to act for at least 30 minutes. Clean with a dry cloth. If necessary, repeat the treatment. Degrease the surface thoroughly with, e.g. methylated spirits prior to the application of the new silicone sealant.

Our advice is based on extensive research and practical experience. However, in view of the large variety of materials and the conditions under which our products are applied, we assume no responsibility for the results obtained and/or any damage caused by the use of the product. Nevertheless, our Service Department is always at your disposal for any advice needed.
